PORTO, PORTUGAL

# Full Arches with Immediate Loading

LIVE SURGERY ON PATIENT

HANDS-ON SESSION

## CLINICAL EXPERIENCE TRAINING | OVERVIEW

The full-arch immediate implantation and loading concept involve comprehending diagnosis, case selection, treatment planning, and complications management. The procedure requires specific materials and adheres to surgical and prosthetic principles for successful execution. This course will equip the experienced clinician with strong tools to perform state of the art treatment for full arches.

### TOPICS

- Definition and principles in immediate loading and full-arches: Advantages and indications
- How to manage complications
- Surgical planning for upper and lower jaw
- Prosthetic abutments and restorative options for multiple screw-retained restoration

The Lodge Porto Hotel 60 R. de Serpa Pinto St., Vila Nova de Gaia

## THE SPEAKER

Dr. Pedro Moura is a member of the Board of the Portuguese Society of Implantology and Osteointegration (SOPIO). In 2014, he founded, and is currently the pedagogic coordinator at Foramen Dental Education, a dental training center in Porto dedicated to educating dentists in all areas of dentistry. In collaboration with Foramen Dental Education, he is also the Director of the Surgery and Clinical Residency Master's program, Universidad Miguel Cervantes, where he leads a team of residents over a 10-month education and training period. Dr. Moura lectures regularly at both national and international conferences, and has been a keynote speaker at numerous events in the field of dental surgery, including autologous grafts, digital dentistry, sinus lift, full arch, and mucogingival procedures. He owns and manages a clinical practice in Porto that is limited to surgery.
